

# The First Ultra-Low-Voltage SpiFlash® Memories

New 1.2V Devices Feature Small 8-Pin Packages

## 1.2V Serial NOR Flash

*SpiFlash® Memories with SPI, Dual-SPI, Quad-SPI*

### General Description

Winbond W25QxxNE 1.2V series parts are the industry's lowest voltages NOR flash memories in 8-pin packages, these newest members of the SpiFlash® family provide designers with serial flash memories for mobile, wearable, IoT and other demanding applications that call for low power in small packages.

Their low voltages and 42 megabytes per second transfer rate make the new SpiFlash® memories optimal for a broad range of consumer and industrial applications.
